

Module 2 Understanding the Disease and the Organ System_BIO-207

Students will begin work on the Pathophysiology Research paper by choosing an appropriate disease topic that affects an organ system that is discussed in Bio 207. This initial assignment will serve as a portion of the final paper that will be turned in later. This submission should focus on the disease and the organ system it affects.

Discussion of the organ system should include detailed description of: the organ system to include: organs, tissues, and cell populations involved, primary functions, and connections to other body systems.

Discussion of the Disease should give detailed descriptions of: disease, its effect on the organ system(s) involved, history, signs, symptoms, epidemiology, and prognosis.

Information provided should be gained from relevant cited literature to include 1 primary and 1 secondary source and cited appropriately both in text and with a works cited page following APA guidelines.

***Turn it in score should be 20% or less. Direct quotes are not allowed.**

Organ System and Disease (Week 2)

Criteria	Ratings	Points
Understanding of Organ system	Paper gives complete and detailed descriptions of organ system including organs, tissues, and cell populations involved, primary functions, and connections to other body systems. Information provided gained from relevant cited literature. 4 pts Paper gives adequate descriptions of organ system including organs, tissues, and cell populations involved, primary functions, and connections to other body systems. Information provided gained from relevant cited literature. 3 pts Paper gives some descriptions of organ system including organs, tissues, and cell populations involved, primary functions, and connections to other body systems. Information incomplete. Information provided largely supported by cited literature. 2 pts Paper provides inadequate or incorrect information regarding organ system including organs, tissues, and cell populations involved, primary functions, and connections to other body systems. Information incomplete and largely unsupported by cited literature. 1 pts Student did not submit. 0 pts	/4 pts

Criteria	Ratings	Points
Understanding of Disease	Paper gives complete and detailed descriptions the disease, its effect on the organ system(s) involved, history, signs, symptoms, epidemiology, and prognosis. Information provided gained from relevant cited literature. 4 pts Paper gives adequate descriptions the disease, its effect on the organ system(s) involved, history, signs, symptoms, epidemiology, and prognosis. Information provided gained from relevant cited literature. 3 pts Paper gives some descriptions the disease, its effect on the organ system(s) involved, history, signs, symptoms, epidemiology, and prognosis. Information incomplete. Information provided largely supported by cited literature. 2 pts Paper provides inadequate or incorrect information regarding the disease, its effect on the organ system(s) involved, history, signs, symptoms, epidemiology, and prognosis. Information incomplete and largely unsupported by cited literature. 1 pts Student did not submit. 0 pts	/4 pts

Criteria	Ratings	Points
Evidence/Sources	All sources of facts and examples fully documented and mentioned in the paper. At least 1 primary and at least 1 secondary scholarly sources. In text citations and APA Format Utilized. 4 pts Most sources of facts and examples documented and mentioned in the paper. At least 1 primary and at least 1 secondary scholarly sources. In text citations are properly formatted but may need more frequency and APA Format Utilized. 3 pts Some sources of facts and examples documented and mentioned in the paper. Some primary and secondary scholarly sources. In text citations and APA Format Utilized with some errors. 2 pts No sources of facts and examples documented and mentioned in the paper. Inadequate number and inappropriate type of scholarly sources. In Text citations and APA Format not used or used incorrectly. 1 pts Student did not submit. 0 pts	/4 pts
Topic Choice view longer description	Full Marks Disease affects an organ system that is covered in Bio 207 2 pts No Marks Disesae covers a topic that is not discussed in Bio 207 or is not appropriate. 0 pts	/2 pts
