

Details

You will continue to research the disease topic you chose in module 2. In this submission you must research the disease topic you have chosen and the organ system(s) affected by the disease. In your short write-up, include the following:

- Complete and detailed descriptions of the disease's impact on the organ system of choice and peripheral organ system(s), including changes to relevant organs, tissues, and cell populations.
- Include at least one peer-reviewed source and at least two other credible sources.

You are continuing with the same disease topic from module 2, unless your topic was not appropriate.

Details:

- Please follow the grading rubric for this assignment to receive full credit.
- Sources must be cited in APA format both in text and the Works Cited page
- Title your paper "The Impact of (*disease name*) in the Human Body"
- Upload the assignment as a Microsoft Word (.doc or .docx) document using the following naming protocol:
LastNameFirstName_AssignmentName

Criteria	Ratings				Points
Disease Choice	Disease choice relevant to an organ system covered in this course	Disease choice is not relevant to organ systems covered in this course		No specific disease chosen	/5 pts
	5 pts	1 pts		0 pts	
Disease Impact on Organ System	Thoroughly described the disease's impact on the organ system of choice, including changes to relevant organs, tissues, and cell populations	Described the disease's impact on the organ system of choice, including changes to relevant organs, tissues, and cell populations but more detail is needed	Partially described the disease's impact on the organ system of choice, including changes to relevant organs, tissues, and cell populations	Did not or incorrectly described the disease's impact on the organ system of choice	/5 pts
	5 pts	3 pts	1 pts	0 pts	
Disease Impact on Peripheral Organ System(s)	Thoroughly described the disease's impact on the peripheral organ system(s), including changes to relevant organs, tissues, and cell populations	Described the disease's impact on the peripheral organ system(s), including changes to relevant organs, tissues, and cell populations but more detail is needed	Partially described the disease's impact on the peripheral organ system(s), including changes to relevant organs, tissues, and cell populations	Did not or incorrectly described the disease's impact on the peripheral organ system(s)	/5 pts
	5 pts	3 pts	1 pts	0 pts	
Sources	Included at least one peer-reviewed source and at least two other credible source	Included at least one peer-reviewed source and at least one other credible source	Included 3 credible sources but none were peer-reviewed	Sources provided were not credible or sources not provided	/5 pts
	5 pts	3 pts	1 pts	0 pts	
References	Correctly cited references in APA format	Citations mostly in APA format	Citations did not follow any standard format	No citations provided or citations do not lead reader to the source	/5 pts
	5 pts		1 pts	0 pts
