

BRIEFING ROOM

Fact Sheet: Biden Administration Announces Details of Two Major Vaccination Policies

NOVEMBER 04, 2021 • STATEMENTS AND RELEASES

New OSHA and CMS Rules Mean Two-Thirds of All Workers Now Covered by Vaccination Rules

Thanks to President Biden's focus on getting Americans vaccinated, 70 percent of adult Americans are now fully vaccinated—up from less than one percent when the President took office. This is significant progress, made possible by a vaccinations program that made shots free and convenient for months. But more vaccinations are

needed to save lives, protect the economy, and accelerate the path out of the pandemic. To that end, in July, President Biden began rolling out vaccination requirements for federal employees and contractors and calling on employers to do the same.

Thousands of organizations across the country have answered the President's call, and vaccination requirements have already helped reduce the number of unvaccinated Americans by approximately 40 percent since July.

Today, the Biden Administration is announcing the details of two policies to fight COVID-19 that will drive even more progress and result in millions of Americans getting vaccinated, protecting workers, preventing hospitalization, saving lives, and strengthening the economy.

First, the Department of Labor's Occupational Safety and Health Administration (OSHA) is announcing the details of a requirement for employers with 100 or more employees to ensure each of their workers is fully vaccinated or tests for COVID-19 on at least a weekly basis. The OSHA rule

will also require that these employers provide paid-time for employees to get vaccinated, and ensure all unvaccinated workers wear a face mask in the workplace. OSHA has a strong 50-year record of requiring employers to take common sense actions to prevent workers from getting sick or injured on the job. This rule will cover 84 million employees.

Second, the Centers for Medicare & Medicaid Services (CMS) at the Department of Health and Human Services is announcing the details of its requirement that health care workers at facilities participating in Medicare and Medicaid are fully vaccinated. The rule applies to more than 17 million workers at approximately 76,000 health care facilities, including hospitals and long-term care facilities.

The Administration has previously implemented policies requiring millions of federal employees and federal contractors to be fully vaccinated. To make it easy for businesses and workers to comply, the Administration is announcing today that the deadline for workers to receive

their shots will be the same for the OSHA rule, the CMS rule, and the previously-announced federal contractor vaccination requirement. Employees falling under the ETS, CMS, or federal contractor rules will need to have their final vaccination dose – either their second dose of Pfizer or Moderna, or single dose of Johnson & Johnson – by January 4, 2022. OSHA is also clarifying that it will not apply its new rule to workplaces covered by either the CMS rule or the federal contractor vaccination requirement. And, both OSHA and CMS are making clear that their new rules preempt any inconsistent state or local laws, including laws that ban or limit an employer’s authority to require vaccination, masks, or testing.

The Administration is calling on all employers to ensure that as many of their workers are vaccinated as quickly as possible. As detailed in a recent [White House report](#), vaccination requirements work and are good for the economy. Vaccination requirements have increased vaccination rates by more than 20 percentage points – to over 90 percent – across a wide range of

businesses and organizations. According to Wall Street analysts, vaccination requirements could result in as many as 5 million American workers going back to work, and a survey of prominent, independent economists found unanimous agreement that vaccination requirements will “promote a faster and stronger economic recovery.”

Today’s announcements include:

New Vaccination Requirement for Employers With 100 or More

Employees: OSHA is issuing a COVID-19 Vaccination and Testing Emergency Temporary Standard (ETS) to require employers with 100 or more employees (i.e., “covered employers”) to:

- **Get Their Employees Vaccinated by January 4th and Require Unvaccinated Employees to Produce a Negative Test on at Least a Weekly Basis:** All covered employers must ensure that their employees have received the necessary shots to be fully vaccinated – either two doses of Pfizer or Moderna, or one dose of Johnson & Johnson – by January 4th. After that,

all covered employers must ensure that any employees who have not received the necessary shots begin producing a verified negative test to their employer on at least a weekly basis, and they must remove from the workplace any employee who receives a positive COVID-19 test or is diagnosed with COVID-19 by a licensed health care provider. The ETS lays out the wide variety of tests that comply with the standard. Given that vaccines are safe, free, and the most effective way for workers to be protected from COVID-19 transmission at work, the ETS does not require employers to provide or pay for tests. Employers may be required to pay for testing because of other laws or collective bargaining agreements.

- **Pay Employees for the Time it Takes to Get Vaccinated:** All covered employers are required to provide paid-time for their employees to get vaccinated and, if needed, sick leave to recover from side effects experienced that keep them from working.
- **Ensure All Unvaccinated Employees are Masked:** All covered

employers must ensure that unvaccinated employees wear a face mask while in the workplace.

- **Other Requirements and**

Compliance Date: Employers are subject to requirements for reporting and recordkeeping that are spelled out in the detailed OSHA materials [available here](#) . While the testing requirement for unvaccinated workers will begin after January 4th, employers must be in compliance with all other requirements – such as providing paid-time for employees to get vaccinated and masking for unvaccinated workers – on December 5th. The Administration is calling on all employers to step up and make these changes as quickly as possible.

New Vaccination Requirements for

Health Care Workers: CMS is requiring workers at health care facilities participating in Medicare or Medicaid to have received the necessary shots to be fully vaccinated – either two doses of Pfizer or Moderna, or one dose of Johnson & Johnson – by January 4th. The rule covers approximately 76,000 health care facilities and more than 17 million

health care workers – the majority of health care workers in America – and will enhance patient safety in health care settings. The rule applies to employees regardless of whether their positions are clinical or non-clinical and includes employees, students, trainees, and volunteers who work at a covered facility that receives federal funding from Medicare or Medicaid. It also includes individuals who provide treatment or other services for the facility under contract or other arrangements. Among the facility types covered by the rule are hospitals, ambulatory surgery centers, dialysis facilities, home health agencies, and long-term care facilities. Today's action will help provide patients assurance about the vaccination status of those delivering care, create a level playing field across health care facilities, and help to address challenges facilities have faced with staff sickness and quarantines impacting delivery of care.

**Streamlining Implementation and
Setting One Deadline Across
Different Vaccination Requirements:**

The rules released today ensure employers know which requirements apply to which workplaces. Federal

contractors may have some workplaces subject to requirements for federal contractors and other workplaces subject to the newly-released COVID-19 Vaccination and Testing ETS. To make it easy for all employers to comply with the requirements, the deadline for the federal contractor vaccination requirement will be aligned with those for the CMS rule and the ETS. Employees falling under the ETS, CMS, or federal contractor rules will need to have their final vaccination dose – either their second dose of Pfizer or Moderna, or single dose of Johnson & Johnson – by January 4, 2022. This will make it easier for employers to ensure their workforce is vaccinated, safe, and healthy, and ensure that federal contractors implement their requirements on the same timeline as other employers in their industries. And, the newly-released ETS will not be applied to workplaces subject to the federal contractor requirement or CMS rule, so employers will not have to track multiple vaccination requirements for the same employees.
